the FoodChecker

Comply with allergen and calorie legislation

All food operators must provide accurate allergen information to customers who request it, and ultimately provide food that is safe for **consumers with allergies.**
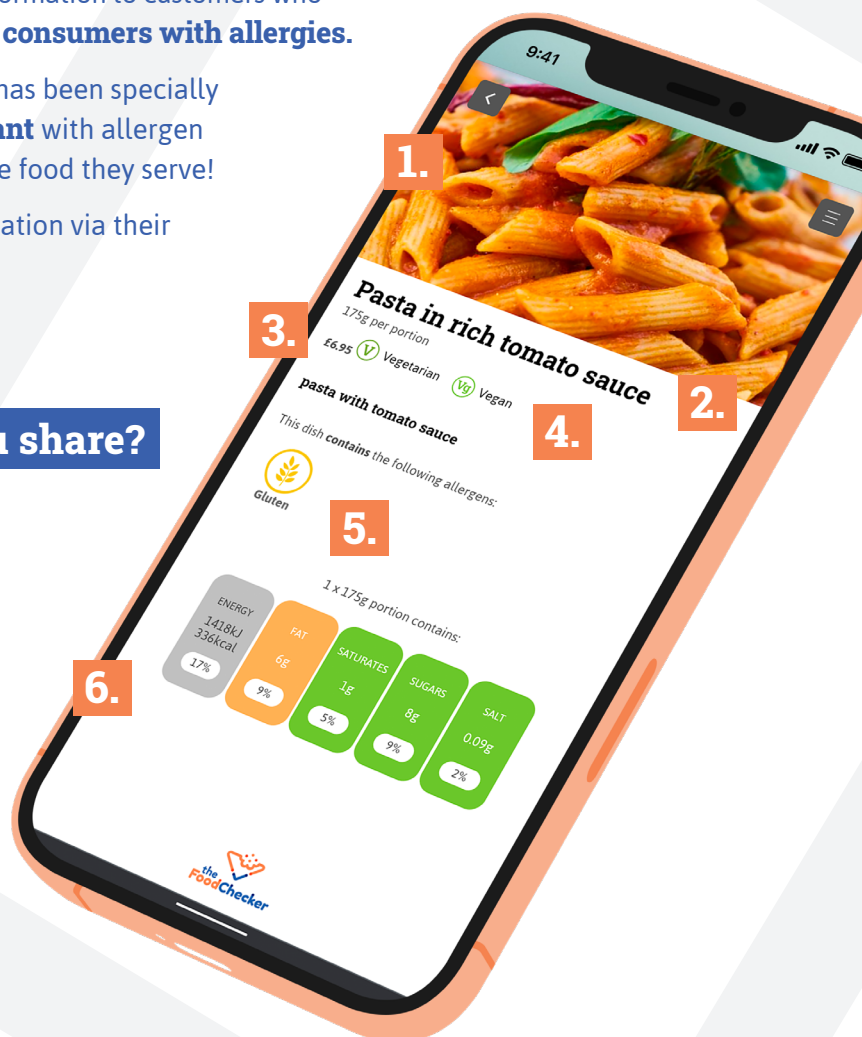

The Food Checker is a new web application that has been specially designed to help foodservice operators be **compliant** with allergen legislation and to easily share information about the food they serve!

Customers can **conveniently** browse menu information via their phone (or tablet) at any time!

What menu information can you share?

You can list as many dishes as you want and choose exactly what information you want to share:

1. **Menu item photo**
2. **Description**
3. **Retail price**
4. **Highlight vegan or vegetarian dishes**
5. **Allergen information**
6. **Nutrition & calorific information**

✓ Catering teams
✓ School staff
✓ Dietitians
✓ Sports nutritionists

Care homes
✓ Residents & family members
✓ Catering teams
✓ Carers
✓ Nurses
✓ Dietitians

Hospitals
✓ Patients & family members
✓ Catering team
✓ Nurses
✓ Dietitians

Add your own branding and more!

- ✓ Add your own **landing page image**
- ✓ Add a personalised allergen **disclaimer**
- ✓ Add a site **footer** and suitable **contact details**
- ✓ Add your own **company logo** and select a complimentary **background colour**
- ✓ Generate **QR codes** to direct customers to view specific menu items

Easy to use, update and manage

The Food Checker is fully integrated with Pi's menu management system, **Piranha**, where you can build your recipes and then decide what dishes and information you want to display.

No need for manual input – product allergen and nutritional data is **sourced from suppliers.**

Recipe cost prices are calculated and tracked by using supplier invoice data, enabling you to see exactly how **each dish is performing.**
